

Matrox® Maevex 6152 Quad 4K Decoder

Showcase content anywhere and in any format

The Matrox® Maevex 6152 quad 4K decoder complements the entire Maevex product line. Efficiently decoding up to four 4K streams, or many more lower resolution streams, the Maevex 6152 decoder introduces plenty of options and advantages for multi-screen decoding. Built on the same core technology as the award-winning Maevex 6100 Series encoders, the latest addition to the family makes a great solution for digital signage, control rooms, houses of worship, military, medical applications, and in any other environments where multiple screens and content are required. The Maevex 6152 decoder can also decode streams from third-party encoders, making it easy to create unique decoding solutions, or integrate with existing ones.

The Maevex 6152 decoder is also compatible with the popular Matrox Maevex PowerStream Plus AV-over-IP management software, which allows for complete control of the entire Maevex network.
